PERSONAL PROJECTS

Image based Steganography

- This project revolves around the development of a software application or system that leverages advanced image-based steganographic methodologies to obfuscate confidential data within digital images.
- We implement encryption Least Significant Bit (LSB) algorithms to protect the hidden data, enhancing its confidentiality.

Newsmonkey

- Developed a web application using React JS, Bootstrap, and JavaScript, where a user can view News of all categories on one page.
- Focused on improving user experience (UX) through intuitive UI/UX design.

Grocery Shop List

- Developed an Android Application efficient grocery list management.
- Utilized SQLite database to store and manage user's item lists, enables users to store and retrieve their grocery lists seamlessly.
